

Aquabot

TURBO T

POOL CLEANING TO A "T"

Have your swimming pool cleaned to a T with Aquabot Turbo T, the self-contained robotic pool cleaner.

Aquabot Turbo T provides quadruple functionality to scrub, power wash, vacuum and filter any pool up to 50' in length, regardless of its shape or surface type, from floor to waterline and everything in between in as little as half the time of other cleaners.

*Just drop it in and press a button!
No hoses to mess with, no costly
booster pumps to run or filter
connections needed.*

With Aquabot Turbo T® you get:

- Complete cleaning of ANY pool in half the time
- Scrubbing brush system loosens stubborn debris
- Power washing jets clean where brushes can't
- Offset vacuum ports for clog-free operation
- Largest capacity reusable filter – more debris with less cleanings
- Industry's healthiest filtration and water circulation
- Convenient pool cleaning at the touch of a button
- Best warranty and support network in the industry
- Maintenance cost savings of up to 50% (chemicals, water, energy)

Complete Pool Cleaning At The Touch of a Button

AQUAPRODUCTS

THE WORLD'S LEADER IN ROBOTIC POOL CLEANING SOLUTIONS

Clean Your Pool to a T in Half the Time and Cost

With Aquabot Turbo T you can clean your entire pool in half the time, reach all of those areas other cleaners miss and cut your total pool expenses as much as 50%, while protecting your family and friends with the healthiest swimming environment... and all you have to do is touch a button.

Forget the days when hoses were either stuck in your pool or dragged out for each cleaning, or when you actually hoped that strangers would show up to your home just so that your pool would be cleaned. Today, Aquabot Turbo T is the state-of-the-art, cost-effective and performance-proven way to clean your pool in half the time of other cleaners. There are no hoses or vacuum poles to mess with, no strangers on your property, and it no longer matters if wind blew dirt in the pool or it just rained after the pool was cleaned, because all you have to do is drop Aquabot Turbo T into the pool and press a button. That's it! Nothing is more reliable or capable. Here's why:

- Self-contained with onboard filtration system and drive and pump motors, the operator is freed from traditional cleaning methods that require pool's filter, hoses, booster pumps, assembly or installation.
- An internal, microprocessor-guided drive motor directs Aquabot Turbo T to systematically clean any residential pool up to 50' in length from floor to waterline and everything in between without wasting time trying to "learn your pool," repeatedly cleaning the same area or missing spots altogether.
- Aquabot Turbo T's intelligent efficiency reduces as much as 50% of the wear and tear other cleaners incur and cleans pools up to twice as fast, which translates into less operating hours and cost, greater reliability and lower maintenance needs.
- Rotating brushes loosen waterline build-up and break down large debris while power washing jets flush out dirt from areas brushes can't reach.
- Dirt and debris are vacuumed in through off-center vacuum ports to avoid clogging and to access dirt along pool edges. The internal reusable filter bag removes everything from large leaves and coins to hair, sand and even microorganisms 10x smaller than what most pool filters can. This ensures the healthiest swimming water, decreases pool filter use as much as 50%, chemical consumption up to 30%, and usage of heat pumps and solar blankets for energy savings.

Relax and enjoy your pool, knowing with confidence that Aquabot Turbo T is the most efficient and effective cleaner in its class, outperforming other cleaners in virtually every category. With nearly 25 years of the world's leading robotic engineering quality and innovations, Aquabots remain the #1 selling robotic cleaners because they clean better, are more reliable and are backed by the best warranties and support in the industry.

Rotating brushes break down debris while power washing jets flush up hard to reach dirt for easy vacuuming.

Specifications

Designed for Pools:	Up to 50' length of any surface
Suggested Cleaning Time:	3 Hours
Auto Shut-Off:	Yes, automatically shuts off when cleaning cycle is completed
Customization:	Yes, digital power supply allows for up to a 7-hour cleaning cycle or automatic operations with existing or new pool auto-control equipment
Filtration:	Self-contained, reusable 34-Quart capacity; Large leaves to fine particles - down to 2 microns
Filtration Quantity:	5,000 gallons per hour
Pump Motor:	Brushless, individually sealed with heat-dissipating and lubricating oil for longer motor life
Drive Motor:	Individually sealed, oil-free, water-cooled
Cord:	61 ft. - buoyant thermoplastic rubber - No chlorine corroding Kevlar®
Power Supply:	CoolTouch™ All-weather resistant
Operating Protection:	Reset Button protects from out-of-water or unintentional operation
Operating Cost:	Approximately 10¢ per cleaning cycle
Wattage:	140 Watts
Voltage:	115 V / 60Hz, 24V at cleaner
Warranty:	3 years prorated / 200 cycles
Safety & Reliability:	Cleaner, cord and power supply are ETL listed to UL Standards - the highest safety and reliability certification in the industry
Unit Dimensions / Weight:	16" x 14.5" x 10" / 16.9 lbs.
Shipping Dimensions / Weight:	17.5 x 17.5" x 19.5" / 37 lbs.
