

The CoverBlast® pool cover pump attachment eliminates the garden hose from the pool. Simply attach to pool cover pump, place on pool cover and aim. Water should be directed so water will run away from the pool. CoverBlast® will shoot the water up to 25 feet away from the pool when attached to a 1800 GPH pool cover pump. It features a compact design that allows it to remain attached to the cover pump while not in use and will not freeze during the winter months.

## FEATURES

- ✓ Replaces Garden Hose
- ✓ Does NOT Freeze
- ✓ Stores Attached to Pump
- ✓ Quicker, Cleaner Setup
- ✓ Compact Design
